An all-Integrated solar-powered light, with a modern-design for an easy installation and excellent lighting output.

Best fit for lighting small areas. This light will light-up an area of about 10' in diameter.

- Mailboxes
- Information panel
- Pay-kiosks
- Bus stop signs

A decorative 10' pole is included, providing an aesthetically pleasing solar lamp post that will blend nicely in residential neighborhood, parks, commercial areas, trails...

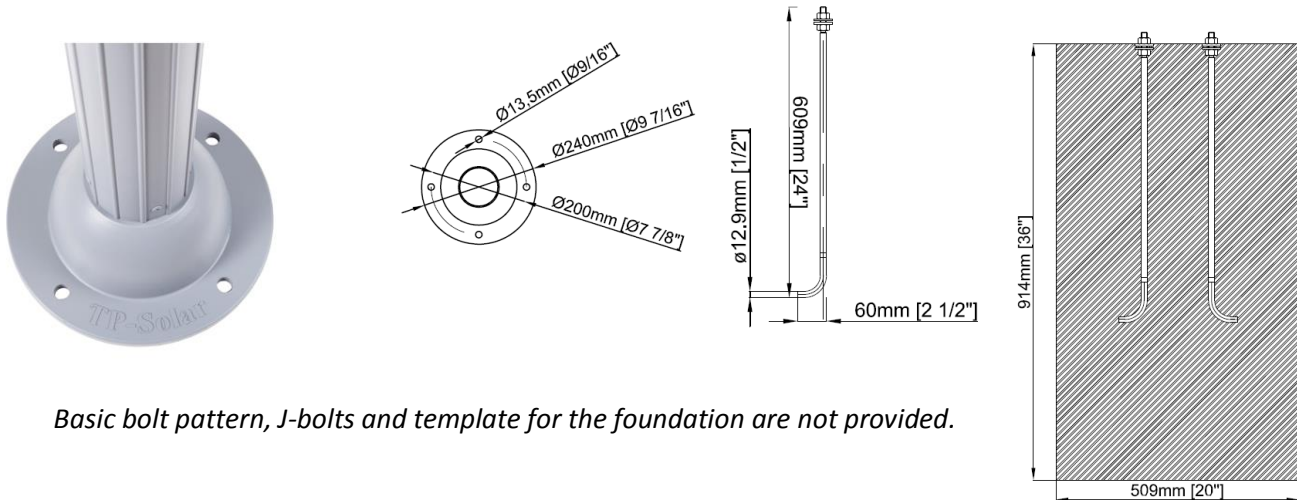

Featuring a motion activated system to ensure a longer working time every night, and longer autonomy during inclement weather.

The full brightness of the light is triggered when a motion is detected, while remaining at half-brightness when the area is not occupied.

- Simply used for lighting a mailbox at night, the **Integra** is a cost-effective lighting solution for small area lighting
- Installed on a pathway, the **Integra** will provide security lighting for late night users in parks and residential neighborhoods.
- Easily installed near a bus stop sign, the **Integra** will provide excellent security lighting for evening bus riders.

Basic bolt pattern, J-bolts and template for the foundation are not provided.
